

Puzzle #43 — December 2004 "Alphabet Soup"

Instructions: Guess the words defined by the cryptic clues (words vary in length from four to nine letters and include five proper names and one two-word phrase), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right margin continue on the next line below; down words that don't end at the bottom margin continue in the next column to the right. Thirteen across words and thirteen down words won't fit in the grid unless one of their letters is removed. Those twenty-six letters are, guess what, the letters of the alphabet in jumbled order. As ever, I am indebted to Kevin Wald for help with the clues.
