

Puzzle

"Hexagony"

by John de Cuevas

Instructions: The six-letter words defined by the numbered clues are to be entered in the correspondingly numbered hexagons. The seven-letter words defined by unnumbered clues in random order are to be entered in the unnumbered hexagons. Words may read clockwise or counter clockwise, but the same letter must always appear on either side of a dividing line between hexagons, and seven letter words must begin or end in the central circles. When the grid is correctly filled in, the letters in the central circles reading from left to right and those in the outer corners of the grid (marked by dingbats) reading clockwise from the upper left will spell an appropriate two-word phrase.

Clues:

1. Soft, Latin, and gastropodan
 2. Mark for more than one conjunction acted dirty
 3. Member of crew holds small volume of yttrium by the end of the spine
 4. Miscellaneous star without water
